

**mødel**  
**& instructions**

# électron s shape

# électron s shape

cut   
glue   
assemble 

cut  
the stripes following  
the dotted lines

cut the blue pattern

wrap the cut pattern  
around a pencil  
then put some tape  
to make a roll

fold the stripes  
in an accordion

put and trap  
the stripes  
into the opposite  
side of the roll

pair of  $C(\infty)$ per

1

# pair of C(∞)per

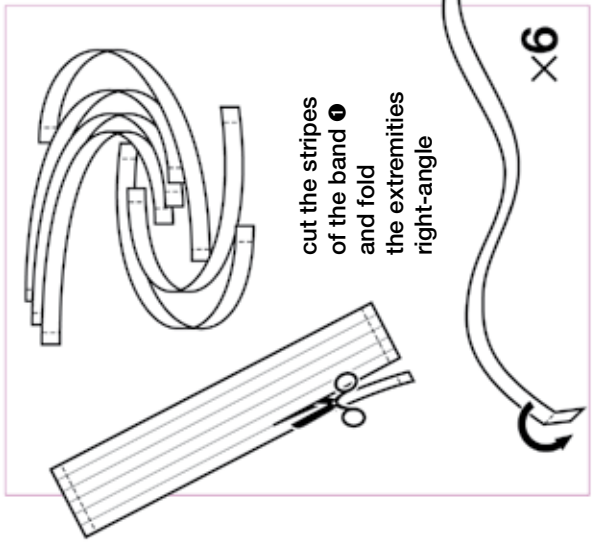

cut the two stripes

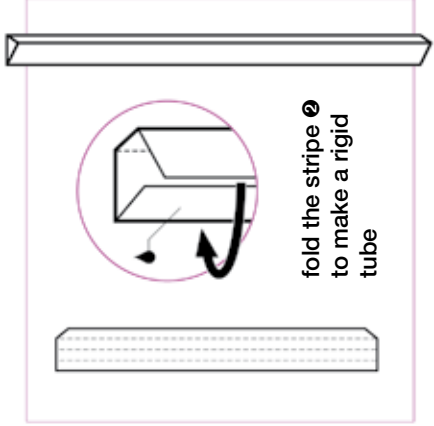

cut  
glue  
assemble

create a second electron following the instructions

cut the stripes of the band 1 and fold the extremities right-angle

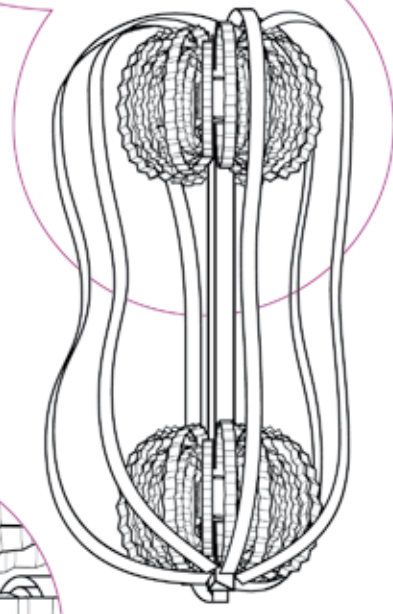

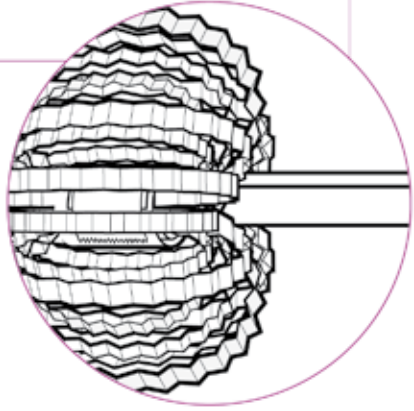

fold the stripe 2 to make a rigid tube

pass the tube through both electrons

trap the extremities of each stripe between the tube and the electrons

# lévitation of a magnet

# lévitation of a magnet

cut  
the magnet shape...

cut  
glue  
assemble

fold and glue  
following the dotted line  
to make a box...

... and the superconductor shape

... and a cylinder

roll the stripe  
around the discs

cut the black  
stripes following  
the lines

fold  
the white  
tabs

glue  
the stripes  
on the marks  
on both sides  
of the magnet
